Job Application for Software Engineer - Early Career

Dear Google Recruitment Team:

About Me

I have recently graduated in Studying Computer Science at California State University – Monterey Bay in June 2022.

Ever since I was a child, my curiosity with technology has only grown with learning more in what technology can do for everyone.

I started scripting when I was in middle school, and in college, taking Computer Science courses had solidified me in becoming a software engineer. My goal as a Software Engineer would be to help make the world a better place, one commit at a time.

Recently, I have developed an Multi-Platform application for RingCentral that includes: Google Chrome Tools, Selenium Automation, and web hooks to automate the process in Asset Retrieval for IT, with Automatic Return Shipping from FedEx.

Why Google?

Thank you for continuing to innovate during these unprecedented times. Knowing that anything can happen, I hope to help innovate as much as possible towards any goals and inactivates that Google has.

With Google, I have used Google from basic Gmail, to Google Cloud Platform, and other products, such as YouTube, and Android. From the early days of Android, Understanding root and rooting my phone was interesting, as a young Teenager. I had full control on what my Samsung Galaxy S3 was, and helped me understand on how the deep layers of an OS is and how customization can happen when root access is granted.

Why Me?

In all my academic and professional life, I have been consistently praised as efficient by my coworkers, managers, professors and peers. From working on academic, extracurricular, or professional projects, I apply proven technical, teamwork, and critical thinking skills, which I hope to leverage into being an Early Career Software Engineer at Google.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I look forward to working at Google that I believe has unlimited potential, if you take a leap of faith with me.

Thank you for your time, and I look forward to hearing back from you.

Sincerely,

Larry Chiem
